

Touch-free cleaning simplified and more affordable than ever before.

C3

Cleaning Companion

**Innovation** has been the cornerstone of Hillyard's success over the past century and our innovative approach to helping our customers clean better, faster, and healthier continues today.

**Our C2 and C3 Cleaning Companions** were specifically designed with that approach in mind. Since their introduction, we have helped hundreds of facilities manager's across the country realize how they can alleviate stress and strain with an ergonomically designed cleaning process, reduce chemical and water consumption, create healthier environments by cleaning more surfaces, more effectively, all while eliminating or reducing the use of mop buckets that are a prime source for cross contamination.

*Here's what managers are saying that are using the machines right here in New York*

*"The C3's clean better than the conventional method of cleaning restrooms, while taking less time. Areas get cleaned daily, which used to get cleaned once or twice a month at best. Restrooms stay smelling clean throughout the day until the next night, and we are using far fewer cleaning compounds and tools".*

*Dave Kiblin  
Belleville Henderson CSD  
Supt. of Building & Grounds*

*"The Spencerport School District is in full support of the C3 Machines. Their versatility and ease of use make them an invaluable addition to our equipment arsenal. Being able to use it as a mobile dilution station and to work without power cords or water lines makes our employees much more efficient and elevates the quality of their work in the process".*

*Nelson Drake  
Spencerport CSD  
Director of Facilities*

*"We have used the C3 machines for several weeks and all my cleaners think it's great. There is not lifting of buckets and they can mix 3 types of chemicals with no trips to the slop sink. We don't have to be concerned with dirty water, and the rooms are cleaner, and ultimately take less time to clean. I like anything that makes the cleaners jobs easier and less labor intensive".*

*David Hardman  
Cuba Rushford CSD  
Supt. of Building & Grounds*

*"As the Facilities Manger for the Strong National Museum of Play, I face numerous challenges while maintaining the cleanliness of the building. One of those challenges is keeping our public restrooms clean and odor free. Since implementing the C2 and C3 Cleaning program, we no longer have that challenge, and the speed and ease that my team can tackle these areas has freed them up to do other tasks.*

*Andy Vanhoughton  
Strong National Museum of Play  
Facilities Manager*

See reverse side for additional comments

*" What a great machine. It allows us to reach the hard to get areas that no one likes to clean in our restrooms, and has raised the overall cleanliness while eliminating odors in the process. By replacing the mop bucket, it also allows us to address MRSA concerns because it significantly reduces the chance of cross contaminating the surfaces you are cleaning or disinfecting. It's also a lot easier for our smaller custodians to maneuver when compared to the old mop buckets".*

*Dave Neenan  
Custodial Supervisor  
New Hartford CSD*

*" The C3 machines has saved my cleaners time and do a better job cleaning when compared to conventional cleaning methods in the restrooms. Areas get cleaned more thoroughly, and are attended to with greater frequency because of the machines ease of use. Our cleaners enjoy using it because it can be used to clean just about any surface, and they don't have to dump a mop bucket out to switch from a disinfectant to a neutral cleaner".*

*Phil Gaffney  
Watertown City Schools  
Supt. of Building & Grounds*

*" Very efficient, saves a lot of labor vs. traditional cleaning. Always using clean water, and you never have to deal with filling our emptying mop buckets, which saves even more time. Very effective cleaning system".*

*Bill Boldt  
President  
Overland Services*

*"A much faster and easy system to use. Superior cleaning results. Delivers a high level of clean easily. Very efficient for quick clean ups as well".*

*Jim Handford /Janice Montrois  
GM / Custodial Supervisor  
The Mall at Greece Ridge*

*" Purchased three C3 machines and at first my staff was a little hesitant to use them, but after a few weeks they all said that the restrooms were cleaner and that they did a better job in less time. Using the Re-juv-nal disinfectant cleaner and the Suprox Multi Purpose Cleaner was a great combination and really solved our restroom care problems."..*

*David Colbert  
Livonia CSD  
Supt. of Bldg and Grounds*

*" Our school district purchased a C3 machine and we were very impressed with how much cleaner our restroom was in just a few weeks. "...*

*Ed Papke  
Supt. of Bldg & Grounds*

*" The Eastside YMCA branch has been using the C-2 machine since our opening in 10/06. With the training provided by Hillyard to my cleaning staff on the use of the C-2 and the chemicals it dispenses we have cut many hours off of our sanitation and cleaning of the locker, and rest rooms. We have total confidence that our members have a sanitized environment in these areas. With the preset dilution rates of the cartridges there is no guess work on mixing chemicals. With its compact size it is very user friendly and easy to maneuver in tight spaces. Besides sanitation, the C-2 is very useful in the cleaning and care of common floor areas that are too small for larger floor scrubbers. Areas such as stairways and entrance foyers can be misted down and wiped clean with a micro pad and with out the use of a sloppy mop bucket. The C-2 is truly ranked at the top when it comes to providing the proper equipment for my cleaning staff".*

*Shane Sponholz  
Building and Grounds Director  
Eastside YMCA*
